

Q: What is a fair price for a bag of chips

At factory it takes 30¢ to make one bag

1.50\$ at vending machine for same thing

about 17.5 chips per bag

2.5¢ per chip at the vending machine

Fair price = 65¢

5x more expensive at the machine

31 bag = per Kg  
1 Kg of chips  
At machine 46\$ / 9\$ AT Factory  
37\$ difference

$100 \times 30 = 3000$ ¢ for ~~100~~ bag of chips  
(AT Factory)

$100 \times 150 = 15000$ ¢ for 100 bags of chips  
(AT Machine)

Factory could make 500 bags for the same amount of money that we use to pay 100 at the machine
