

Creating the Conditions for Learning Mathematics

Project Description:

Included in this resource are print and video clips inclusive of material from Deborah Ball, Doug Clements, Alex Lawson and Lucy West, and as well as a number of articles and the Landscape of Learning for both addition and multiplication. This resource allows viewers to observe students as they are learning. They also observe educators as they watch and examine the classroom footage and the student work from the lesson. Throughout this video, viewers have the opportunity to consider the mathematics that students learn within the Ontario Curriculum and how contexts set the stage for learning. Included in this resource are print and video clips inclusive of material from Deborah Ball, Doug Clements, Alex Lawson and Lucy West, and as well as a number of articles and the Landscape of Learning for both addition and multiplication.
